产品描述

产品描述

Vehicle Monitor is a high quality shock resitant digital monitor built for conditions associated with vehicles. It comes with sturdy mounts and brackets and all connections are made via a wiring loom which can be fully hidden. The heavy duty camera is also built to last. Made out of cast aluminium it can handle the odd knock or two and it has a built in heater to prolong its life, this keeps moisture out and means you will never have to put up with a foggy image. The camera is also IP69K rated meaning that it can be pressure washed at high temperature. Connections to cameras are all made via waterproof 4-pin screw type connections and the camera also comes with a rubber cable shroud and gromet for entry through an external surface.
